

M3-18 Quick Release Cable System

The M3 system is a modular way to link **any field mixer** to a camera deck, through wireless equipment or hardwired directly. The Quick Release set is the basis of the system, with two balanced XLR lines and a stereo headphone tape monitoring return line. 7 pin Neutrik XLR release points provide reliability while the ultraflexible cable feels right and coils easily. Wireless harness', 7 pin splitter boxes and extension cables compliment this classic design.

MIXER ENDS:

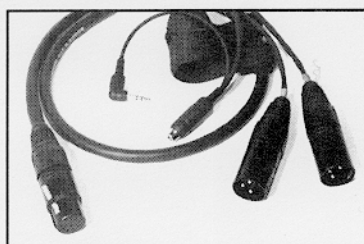

18 ft standard -
other lengths available

Shure, Cooper, others.
90° XLRs available.

CAMERA ENDS:

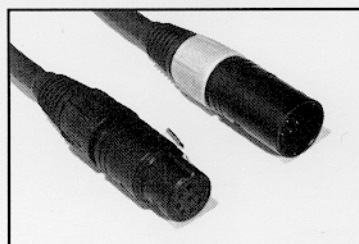

34" length standard,
other lengths available

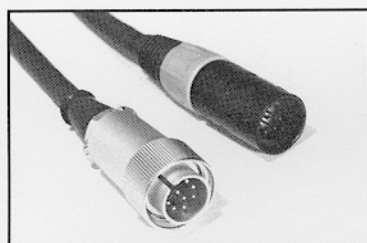

Betacam - 90° mini with
earpiece output

EXTENSIONS:

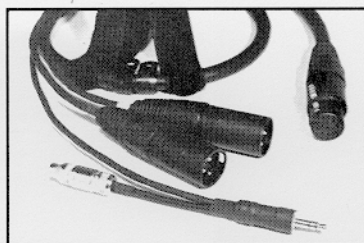

30 ft standard,
custom lengths available

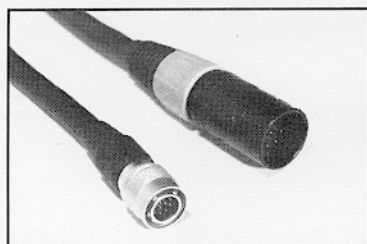

M3-30X - 30 ft

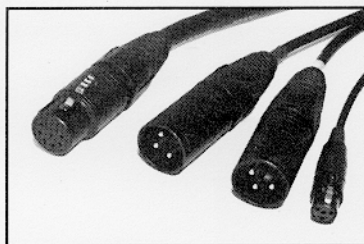

With 10 pin Hirose; Audio
Developments, Cooper, Film
Tech, SQN4S-II/III, PSC ALPHA,

M3-Quick Release Cable System **Wireless connections**

RF-2X TRANSMITTER HARNESS

Connect camera link transmitters to the mixer end of the M3-18 Quick Release Cable. This provides single connection changeovers from hard wire system to wireless feeds to the camera.

FEATURES:

- RF chokes and filters built into 7 pin female
- Robust construction
- 18" standard length
- Red & Blue markers
- Optional LINE TO MIC PADS built in (add "PAD" to part number)

For Lectrosonics belt packs:

#RF-2X/Lectro-18"

For other types:

#RF-2X/Specify model/length

RF-2R RECEIVER HARNESS

Two camera mounted receivers are connected through the receiver harness to the **camera end** of the M3-Quick Release cable. This 8" assembly has a 7 Pin male XLR at one end and two right angle XLR females (marked red & blue) for the receivers.

The single 7 pin connection point enables fast changes from wireless mixer feeds to the hard wire system.

For Lectrosonics:

#RF-2R/Specify model - 8" STD length

Other types:

#RF-2R/Specify model/length
