

rV3

### Application Notes:

The rV3 is small, easy to operate and extremely reliable. You'll find the rV3 anywhere talent or production people need to control their audio. The use of wireless receivers can be improved too, especially units with no headphone output.

### Remote Volume Control

The rV3 controls earpiece or headphone volume for live remotes and phone interviews. **IFB situations may be simplified** by using the rV3 instead of battery powered amplifiers. A +4dBm line or active headphone output will easily drive an earpiece or Sony MDR-7506 headphones through this passive attenuator.

#### FEATURES:

- **No power required;** passive design
- **Compact:** H: 4.5", W: 1.7", D:1.5", 6 oz.
- XLR input, (unbalanced, pin 2 hot)
- Earpiece outputs - mini and 1/4" mono
- Headphone output - 1/4" mono both ears
- Environmentally sealed volume control
- Belt clip - stainless steel
- Durable finish with laser engraved markings

#### Accessories available:

- #TRXY-12 - Adapter "Y" adapter cable for running two rV3s from a headphone output
- #TSX-1/4" to XLR adapter
